

AgentDesk

AI Agent Management Platform

We design, deploy, and support IT products

What problems does **AgentDesk** solve

Reduce time-to-market when
launching new AI agents

Control efficiency and
quality of AI agent usage

Reduce costs of creating and
managing AI agents

Manage data access security for AI
agents

Value Realization Crisis

«By the end of 2025, **up to 95%** of companies will remain stuck in 'pilot purgatory' without achieving tangible business results»

From Pilots to Scaling

01

stage

Discovery

Search for business cases for effective AI agent deployment

02

stage

Pilot

Select and test AI application hypotheses

03

stage

AI Agent Factory

Create conditions within the company for continuous delivery of effective AI agents
corporate AI agent office, technology stack selection

04

stage

Scaling

Scale functionality. Train client's AI users. Continuously monitor AI performance and evaluate ROI. Continuously improve and evolve.

Results

- Reduce costs and execution time of key processes using AI agents
- Free up people for tasks that directly impact business growth

Why do you need **AgentDesk**

01

Create and manage AI agents and copilots

02

Enable LLM integration with corporate systems

03

Provide universal access to sanctioned LLMs

04

Optimize costs of launching and scaling AI initiatives

05

Establish a corporate AI agent office

AI Platform: Business Architecture

AI Agent Configuration

List of agents, instructions, what each agent does and how

WorkFlow and Orchestration

Agent workflow orchestrator:
when tools are called, what
constraints apply

System Integration

Corporate systems

MCP

API

Knowledge bases, RAG

LLM

on-prem: DeepSeek, QWEN, Llama,
Open AI, Gemini.
Cloud:, Giga Chat

ML-models

Pre-configured ML models
Client's ML models for specialized
tasks

Deployed AI agents

Monitoring & Governance

- Model Usage Efficiency
- Risk Control
- Data access security control
- Anomaly detection
- Data depersonalization management

Supported LLMs?

Global LLM

LLM

AgentDesk: Capabilities

AgentDesk

- On-prem/ Cloud
- Prebuilt AI agents for Sales, HR, Procurement
- 500+ Prebuilt API/ MCP
- Fork of market leader Langflow
- Perpetual license
- IP rights transfer
- 24/7 support

Where to start?

1

30 days

- AI Maturity Assessment
- AI Opportunity Map for one department / process

Launch a Pilot

- 3-5 AI scenarios launched
- Hypotheses confirmed

3

90 days

- Architecture, Data, MCP, and RAG configured on the platform

Launch AI Agents at Scale

2

60 days

- **Start first Project**
- Technology stack and format defined (cloud and/or on-prem)

4

180 days

- AI governance launched
- Employee training
- **Agents scaled**

See how it works for your business

Let's start with an introductory meeting
- we'll discuss your goals and explore the possibilities

Introductory Meeting

Discuss your objectives, demonstrate capabilities, assess applicability

1-2 hours • Free

Solution Demo

Show functionality with examples, answer your questions

2-3 hours • Using your data

Pilot Project

Deploy on a limited perimeter, train your team, evaluate results

2-4 weeks • First results

Rollout

Deploy organization-wide, technical support, continuous improvement

Ongoing • SLA 99.9%
